

CAREER OPPORTUNITY - SECURITY RISK CONSULTANT

Flexible location (China/Hong Kong/Singapore preferred)

ABOUT THIS ROLE

The Security Risk Consultant will provide specialist Security Risk Management, Business Continuity Management and Business Resilience advice for clients located in Hong Kong, Macau and occasionally across the Southeast Asia region.

The Security Risk Consultant may also assist with company business operations, including support for marketing, finance, training, admin and HR, as required.

JOB REQUIREMENTS INCLUDE:

- A University degree in a security or risk management (or related) subject
- At least ten years law enforcement or military (or similar) experience
- At least five years corporate security management and/or security consulting experience
- A high standard of written and spoken English, commensurate with client senior management expectations (i.e. attending and actively participating in senior level client meetings, preparing high-level written reports, presenting findings and recommendations at board level events and conferences)
- Spoken Cantonese and/or Mandarin and written Chinese-language abilities would be a distinct advantage

SPECIFIC RESPONSIBILITIES INCLUDE:

- The provision, management and delivery of security risk management, business continuity management and business resilience services for clients to the highest levels
- Providing specialist advice to clients and project management teams regarding security systems and high-level design inputs to guide project tendering, procurement and management
- Coordinating installation of technologies with the project management team
- Preparing written reports and associated deliverables contractually required by clients and their project management teams
- Coordinating the installation of security system technologies throughout the duration of a project
- Reviewing and coordinating with consultants, contractors and operators to authorise and maintain a project schedule within specifications

- Reviewing design submissions and coordinating with contractors and operations to ensure timely release of information
- Reviewing shop drawings as required
- Monitoring the change process to ensure that changes are submitted correctly and approved before any work commences
- Providing support for and communicating closely with consultants and contractors on new/modified designs, as required

GENERAL RESPONSIBILITIES INCLUDE:

- Complying with general project requirements to produce and distribute reports as required, including progress reports, schedule updates and any problem reports
- Timely and accurate problem reporting, including an impact statement
- Scheduling and chairing progress and coordination meetings as required
- Complying with site Health and Safety regulations
- Complying with project security and confidentiality requirements
- Supporting company business operations, as required, including general management of the business add local staff and support for marketing, finance, training, admin and HR matters
- There may be a requirement for the Security Risk Consultant to complete additional duties as specified by senior management
